

# Finding a Book

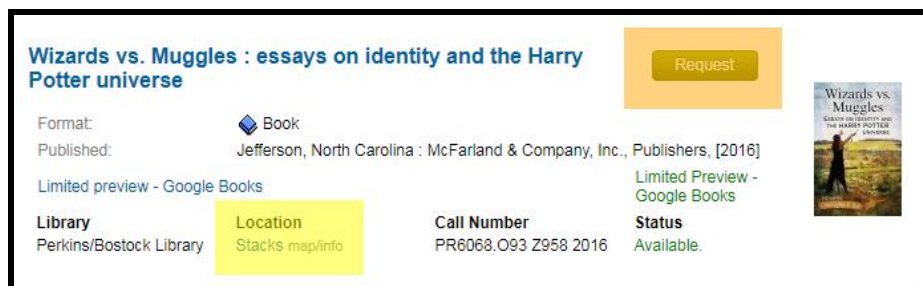

Before your library workshop:

1. Go to the library website, [library.duke.edu](http://library.duke.edu).
2. In the main search box, switch to a 'Books & Media' search. Search for a book related to your research topic.

3. Find an available \*print/physical\* book and go get it from the library it is located in. **TIPS:** Make sure the book status = **Available**; Click the '**Stacks**' hyperlink to pop up a map to the library & floor where it is located; **Note:** The green '**Request**' button will only work when a book is *unavailable* or *off-site*. Most of the time, you will have to go get the book.

4. Check out the book at the library service desk using your Duke Card.
5. Write a few sentences describing any obstacles or observations you made about the experience of navigating the library and finding this book.
6. Bring the book to class.

*If Pusheen can do it, so can you!*
